Hi Emmanuelle,  
Will you have someone respond to Ex. 6 Personal Privacy (PP)  
If so we will close out the r9.info@epa.gov file.

Deborra Cohen  
Director, Environmental Information Center/Library U.S. EPA Pacific Southwest, Region 9

Comments:

Extreme Arsenic Contamination in the system that is operated by Ivan Sidney and cohorts of the FMCV water department on the Hopi Reservation. Requests made to provide the CCR have been unresponsive, to include an 'above the law attitude' that comes directly from Sidney, himself. The arsenic levels are so high that it is above the standard measurement of acceptable contamination. People are dying of cancer and other diseases caused directly by this contamination. This organization has never been held accountable or responsible as other entities would surely have been made to rectify said contamination. It was determined that IHS had found sufficient cause to fault him with findings based off high levels of arsenic from an investigation done 3 years ago by the San Francisco IHS facility. No monitoring or accountability documentation has been located. It was ascertained from archival information that Sidney was to rectify all findings by March 31, 2020. This has not been done and Sidney has made statements to the effect that "EPA and IHS will not enforce any of their findings" as he feels he is above regulations and mandates from any governmental agency. He has increased water rates without justification or transparency and has resorted to blackmailing community members by threatening to turn off their water if the payment has not been rendered. The Clean Water Act has not been adhered to by Sidney and other agencies at this writing. We are kindly asking for resolve in this matter of dire emergency. Thank you for your required involvement and assistance in this matter.
